## PUBLIC HEALTH MONOGRAPHS

1957 Titles, Numbers 46-50

U. S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

MARION B. FOLSOM, *Secretary*

PUBLIC HEALTH SERVICE

LEROY E. BURNEY, *Surgeon General*

**T**HIS INDEX to *Public Health Reports* and Public Health Monographs is divided into a subject index and an author index.

The subject index carries one or more entries for each item published. In addition to the subject headings, categorical headings include ANNOUNCEMENTS (divided into EXAMINATIONS, ORGANIZATIONS, and PERSONNEL), CONFERENCE REPORTS, DEATHS, FILMS, FRONTISPIECES, GRANTS AND FELLOWSHIPS, LEGAL NOTES, PUBLICATIONS, PUBLIC HEALTH MONOGRAPHS, and TRAINING COURSES.

Public Health Monographs published concurrently with *Public Health Reports* in 1957 are listed in numerical order under that category heading. The monograph summaries appearing in the journal are indexed under appropriate subject headings.

One asterisk before the page number indicates an original, signed article. The sign of two asterisks, used only in the author index, indicates a monograph. Entries without any symbol may refer to summaries or briefs of papers presented at conferences, narrative conference reports, statements or reports of committees, short reports without authors, or similar items.

Illustrative material on the inside of the front cover of each issue is indexed by month under the heading FRONTISPIECES. It is recommended, therefore, that the covers be included in a bound volume.

A compiled annual list of Public Health Service publications may be obtained from the Public Inquiries Branch, Office of Information.

## CORRECTIONS

MARCH, p. 243, 2d column, lines 15 and 16, in the report entitled "Periodontium Not Injured by Use of Fluoride Water," a summary of a paper by Dr. Albert L. Russell, the figures should be reversed so that the text reads: "One of the comparisons was between 379 adults . . . in Colorado Springs . . . and 144 adults . . . in Boulder . . . Colo."

FEBRUARY, p. 167, 1st column, in the article entitled "Smallpox Control by Mass Vaccination With Dried Vaccine," by Harald Frederiksen and James P. Sheehy, this statement appears: ". . . yet it [dried vaccine] has been systematically produced and used on a large scale only in one country, Indonesia." A correspondent reports that the product is also produced in Saigon, Viet Nam. The embassy of that country informs us that "dried vaccine against smallpox has been produced at the Pasteur Institute in Saigon since 1925, and the average annual production is 9,000,000 doses."
